

Technical data sheet

Translucent Pigment concentrate

Liquid pigment - many colours translucent non-toxic epoxy resin dye for UV resin, epoxy resin and 3D printing UV resin colouring, resin jewellery making - high concentrated epoxy resin colour pigment for art, paint, crafts.

一. Constituent data

Name	CAS	Percent
Yellow, Coffee, Golden Yellow, Black, Lemon Yellow, Sky Blue, Purple, Pink, Fluorescent Green, Sapphire Blue, Rose Red, Emerald Green, Fuchsia, Brown, Green, Violet, Red, Azure, Grass green, Orange, Peacock Blue, Blue, Purplish Red	2955-16-0	85%
Resin	38891-59-7	15%

二. Physical property

Appearance and character: Liquid Pigments

Melting point (°C): -15.3

Boiling point (°C): 225.7

Relative vapor density (air=1) : 3.92

Relative density (water=1) : 1.2419

Saturated vapor pressure(kPa): 0.13(58°C)

Flashing point (°C): 100

Ignition temperature(°C): 436

Solubility: slightly soluble in water, soluble in alcohol, ether, aromatic hydrocarbon

三. Package:

The packaging specifications of this product are 10g, 50g, 100g, 500g and 1kg. If you need a larger package, please contact us for replacement. We support customer brand customization services.
